THE NEW PROFIMAT.

PLANING AND PROFILING
WITH WEINIG QUALITY.

WEINIG OFFERS MORE.

TIME HAS COME FOR THE NEXT GENERATION.

When a company sets out to find a suitable successor, important questions arise: What does the next generation have to do to meet the challenges of a rapidly changing industry? Does it have the combination of responsive customer service, flexibility, reliability and quality needed to survive in the market in the long run?

With the new Profimat, WEINIG delivers the answers to these and other questions. The planing and profiling machine follows

in the footsteps of WEINIG's tried and tested solutions. It builds on their strengths, optimises them and adds advanced features.

Good to know: despite various innovations, the new Profimat does not require more space than comparable predecessor models.

Once it has been installed, you as a craftsman will enjoy a high degree of operating comfort and impressive smoothness with the new Profimat. Changeovers are faster and easier than ever.

TRADITION COMPELS

THE NEW PROFIMAT IS AVAILABLE IN TWO CONFIGURATIONS THAT ALREADY HAVE WHAT IT TAKES TO BECOME A LEGEND. WITH EITHER OF THE TWO, YOU CAN BENEFIT FROM THE FOLLOWING FEATURES

Broad appeal

If you have big things to accomplish, the Profimat is available with a 260 mm width capacity - increased from the standard 230mm.

A reliable partner

With the WEINIG heritage of engineering excellence and the omission of unnecessary electronics, the Profimat will be extremely reliable and require minimum maintenance.

Smooth and precise

With its robust cast iron base and precision machined spindles in proven WEINIG quality, the Profimat ensures perfect surface quality of your products.

Minimum environmental impact

Due to technical advances, the Profimat is surprisingly energy efficient which may be supported by subsidies or grants.

Everything under control

The Profimat can be equipped with an intelligent control package ideal for frequently repeating products. A 10.1" touch screen display offers clear user guidance to set for profiles with the push of a button. Motorised CNC controlled axis provide automatic setting for planed all round production. As standard the machine is controlled manually.

Class leading comfort and safety

The intelligent design of the Profimat ensures short set up times, high user safety and ergonomic operation with simple controls.

THE SMALL BUT SIGNIFICANT DIFFERENCES

PROFIMAT 30

- » Configurable with 4 or 5 spindles
- » Feed speed up to 15 m/min
- » Spindle speed 6,000 rpm

PROFIMAT 50

- » Configurable with 5 or 6 spindles
- » Feed speed up to 30 m/min
- » Suitable for hardwoods and splitting
- » Spindle speed 7,000 rpm (8,000 rpm optional)

High performance in a small space

Thanks to its compact design, the new Profimat will fit in the same footprint as previous comparable machines.
